DETAILED ACTION

Status of the Application

The change of address form (Paper No. 5) received on 06/13/02 has been entered.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to method related to disease, classified in class 435, subclass 25.
 - II. Claims 15-19, drawn to a method of identifying inhibitors, classified in class 435, subclass 69.2.
 - III. Claim 20, drawn to a composition.
 - IV. Claims 21-26, drawn to a method of treatment.
 - V. Claims 27-35, drawn to a method of determining oxidase activity, classified in class 435, subclass 25.
 - VI. Claim 36, drawn to a composition.
2. The inventions are distinct, each from the other because:
3. The compositions of Inventions III and VI and the methods of Inventions I, II, IV and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a

Art Unit: 1627

materially different process of using that product (MPEP § 806.05(h)). In the instant case the compositions can be used with other methods.

4. Inventions III and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are entirely different compositions.

5. The individual methods of Inventions I, II, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

6. Because these inventions are distinct for the reasons given above and

- a. have acquired a separate status in the art as shown by their different classification;
- b. have different and separately burdensome: manual and/or computer: structure, name and bibliographical searches; and
- c. have divergent subject matter,

restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1627

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
